

Preparation Going Forward By Barter

William J.D. Shaw updated: Aug 18, 2020

If you are going through the Tribulation period by not taking the mark of the beast, then you will be outside the One World System and One World Economy. This means to exist you need to go forth first by placing your trust in God and second by bartering. However there are some major restrictions that will apply that do not exist today, these making it much more difficult in going forward by bartering than what one might initially think. Also recognize that the Tribulation period is 7 years long which is a very long period of time to go forward outside the One World System. This document is to help you recognize and consider the difficulties and if you take the Bible seriously, to help you mentally and physically prepare.

This document assumes you are one of God's chosen people and you will not accept the One World Economy, therefore you will have to go forward outside the One World System. The choice to go forward outside of the One World Economy occurs just prior to the start of the Tribulation period. You need to endure the times of sorrow and the three plagues God sends upon the world prior to the start of the Tribulation period. God's protection to His people only starts just before the forth plague at the beginning of the Tribulation period. Also recognize that the One World System will persecute you and you are not protected from this occurring.

In the early part of the times of sorrows, it will be the most dangerous period for all people, until the One World System is initially established. In the country in which you live there may be a time of lawlessness and possibly civil war. Once the One World System is formed in your country law and order will be maintained. In some countries the process will occur smoothly with little disruption or lawlessness, in other countries the upheaval will be extremely bad and severe.

Initially one needs to set the stage as to what happens and how society will operate under the One World System. It will not be as in war time, it will have strict law and order enforced upon the population. Those that accept the One World System will have regular lives, jobs, salaries, bank accounts, cable television, dining out and other common life endeavors. In other words, for most it will be more or less regular lives. Those not accepting the One World Economy will suddenly find themselves outside of the large majority of the population, outside of the new society, outside of the Government in their own country. These outcasts will now be non-citizens, with no rights and no use of Government systems and infrastructure. It also means that you will not be able to call upon the police to protect you. In your country there will not be any social system that will help you. You will suddenly become an alien inside your own country.

First let us assume you took steps well ahead of the start of the Tribulation or the time at which you would have to subscribe to the One World Economy. This means you converted your assets such as money or bank accounts, stocks, bonds and **cash** into barter assets for trading and items for survival. These items might be any or all of the following and more; a utility trailer, a camper or RV, gold, silver, copper, nickel, long term storage food packages, over the counter drugs, anti-bacterial drugs, anti-biotics, toiletries, rechargeable batteries, battery chargers, deep cycle batteries, candles, matches, lighters, water purification systems and storage containers, spices, gloves, boots, shoes, socks, blankets, tarps, 6 mil poly vapor barrier, garden seeds, camping supplies, electric bicycles, solar panels, LED bulbs, first aid items, sunscreen, a radio, general storage containers, ropes, tools, books with information on various topics and so the list goes on. If you do not take action in preparation well ahead of time then you will experience, first shortages of

items or being sold out as well as no longer being available, or alternately available at greatly inflated prices. Note the first item that you need is a copy of your Bible.

Second you considered where you were going to live. Living in a city will be extremely difficult if not impossible and that will likely be limited up to 6 to 12 months. Living in the country on a piece of land with water is the most preferable. Good drinking water is critical. Last is living in the wilderness as this will be very difficult but everyone might be forced into this at some point in time. Chances are reasonable that God will provide places of refuge in different countries throughout the world for his people, but we really do not know, thus faith and trust are paramount and must be the main way forward. Places of refuge if they exist might be farms in remote locations or Bible camps or some other special locations such as developed camps in the wilderness. Generally God's people will need to flee out of the cities and towns, and into the country. The further away from the major cities the better are one's chances at survival. In many locations surviving the winter will be brutal. Places of refuge will likely develop naturally and God will direct those in the cities to these places.

The main way forward will be for a number of like minded people of God to gather and work together as a community, supporting each other, having gardens, livestock and becoming independent as much as possible and removed from the rest of the world. There are lots of unknowns and the way forward is totally uncharted as it has never occurred at any time previously. Being able to survive against the technology available to a One World Government in today's time, being used against you, might be very challenging.

Now let us look at some of the difficulties that might easily be overlooked. First you will not be able to legally drive a vehicle on public roads. You will not be able to register a vehicle and you will not have a drivers licence after the One World System is in place. If you have a vehicle and wish to sell it, it will be through a barter arrangement. Alternately, You might be able to barter with someone in the One World Economy to register your vehicle in their name and drive it for you. An alternate means of travel would be a bicycle or better yet an electric bicycle providing you have access to some form of electricity. Generally a horse is not a practical option since the amount of feed to keep a horse is in direct conflict with food produced for your personal survival. Pets such as large dogs again will not be acceptable as again food will be a premium. An exception would be having one large well trained dog in a community for warning as a watch dog or to protect chickens and sheep.

Second you will not be able to use a hospital as it will be controlled by the One World System. Pharmaceuticals you might be able to barter for. If a medical doctor is in your like minded barter community, at least that person will be able to provide some limited medical service. Dental services will be very difficult, first you will need transportation and second you will need a dentist that is willing to barter.

Third if you have land or a house you will need to pay taxes and most likely need to pay for services such as water, sewer, electricity, and natural gas. To do this you might manage for a while if you have a sympathetic neighbor or friend that is in the One World Economic System to which you may be able to barter providing you have sufficient assets to use for bartering. You will not be able to sell your house, it will need to be exchanged by bartering, which would occur at a basement bargain price. Any pensions of any kind, as well as annuities, stocks and bonds will become null and void to you unless you accept the One World Economy. You will not be able to work and receive a wage. Any money that you have in a bank will disappear and cash currency will not have any value. This is why the Bible calls this period a **temptation** that will come upon the whole world.

Once the One World Government and its One World Economy comes into full operation, if you do not accept and buy into it then suddenly **you have no rights**, you are no longer a valued member of society and you will have no way to handle transactions. You no longer can receive electronic income, and all income will be electronic, and you will have no banking access. You no longer will have internet or cell phones unless you can barter with someone to have them get access in their name so that you can use them. All these common benefits that one takes for granted are taken away, these are some things in addition to what is covered above previously. Note that a cell phone even when turned off allows you to be tracked and located. You will be able to use a radio if you have electricity, but most likely not to use a radio transmitter. Radio transmissions will be closely monitored and controlled and not allowed in a One World System.

One will not be able to use the internet to purchase items and mail will not be available since it is Government run and you will not be able to pay for courier services. You will not be able to go into any store and purchase items since you cannot pay with electronic money. One will not have cable or movie access. All transactions will need to be carried out using friendly neighbors with barter arrangements. Note that refrigeration is not available unless one has electricity or propane. Solar panels as well as diesel or gas generators and deep cycle batteries and controllers would be needed in order to generate and store electricity. Small amounts of electric generation could be accomplished with a modified bicycle and small generator. Generally now days well pumps need electricity to operate. If you are able to make your way to a windy location a wind generator would generate electricity. However, normally fuel for diesel or gas generators would need to be bartered for. Heating would most likely require wood, which might be difficult to collect without the legal use of a vehicle. Going to the bathroom will likely be outdoor toilets or just using a shovel with ashes or dirt. An independent potable water source will be a critical requirement, for drinking, for growing food, for personal hygiene and for food preparation. Fuel and propane will not be able to be ordered and delivered. Propane would require barter with small tanks. The reality is that those going forward by barter will be required to **live off the grid**. Part of this will be hunting for food, so traps as well as bow and arrows or a cross bow will be required. Recognize all weapons, especially firearms and ammunition will be confiscated and banned. Likely having a bath or showering will be infrequent, so will be doing laundry. Since weapons will be banned it will make hunting more challenging as well as methods of protecting your community. Things you might rely on will eventually break down and need repairs, this applies to mechanical and electronic equipment. You would need to barter for replacement parts, providing they were still made and were available. Your shoes or boots will wear out as well as your gloves, socks and other cloths. Electricity is required mainly for pumping water and second for refrigeration, however even the little things like a light in the evening for reading as well as being able to listen to music require electricity. Also electric tillers for gardening are important if one has some amount of electric generation from solar or wind as it frees one from using hydrocarbon fuels. Gardens can be grown and maintained by just using manual labor but where one can take advantage of using power providing one has access to some form of power, it will allow a much higher and easier level of producing food.

The life you previously enjoyed will come to an abrupt stop. Now going forward day by day becomes one of doing what you can for survival and going forward by bartering assuming you have something worthwhile to barter with. Transportation is now extremely restricted. You will need help from others to survive, both others like yourself outside the One World System and others that are friendly who are within the One World System. News will be totally controlled by the One World System, so you will not be able to know what is really happening only what is broadcast by the One World System. One will need to follow the timing sequence of God's plagues as well as counting of days and years to keep track of your placement and progress through the Tribulation period.

Essentials will be matches, lighters, gardening seeds, warm cloths, rain gear, water purification equipment and water storage, long life packaged survival food to get you through the first year or two until you are able to harvest produce from a garden. You will also need knowledge on farming, surviving off the grid, and surviving in the wilderness as well as repairing equipment and modifying items in order to have them work in completing functions that are needed. Chickens will be in high demand as well as sheep and goats. Seed saving techniques and food preservation knowledge will be required. You will need a network of friends and family all working together in order to exist outside the One World System. You will need basic books on gardening, homesteading, natural medicines, general medical diseases, first aid, repair manuals, wilderness survival, butchering animals, useful recycling methods, hunting and wild plant identification. You will need to study and learn new skills and adapt as you go forth. Overall practical knowledge will become extremely important. If you become bored, study Hebrew as a new language. If you are a woman, don't get pregnant during the Tribulation.

In addition to Faith and Trust in God, there is a series of events that will be taking place which is in our favor. If you have made the correct choice in going forward, the plagues starting at the fourth one that God sends upon the world will not act upon you. At the same time the One World System will be struggling under these plagues in trying to hold things together. These plagues are continuous and become more severe as time goes forth. The first three plagues result in roughly 2 billion people in the world being killed. The plagues of God during the Tribulation occur over the 7 year period. By the ninth plague at least another 2 billion people will have been killed. So it is very possible that those of us living outside the system may become a very insignificant concern to the One World System that struggles under God's plagues and therefore those outside the system might just be left alone and ignored. This will be more likely if you generally are out of sight being well removed from cities. You will not be able to revolt as there will be so few that will not take the mark of the beast, in comparison to the world population. Also any opposition to the One World System will be squashed completely, totally, brutally and immediately. Very likely borders between countries will become transparent with easy access from country to country. Air travel will not be available to those outside the One World system.

Note that the Bible is clear, if you accept the One World Economic System, it is the same as taking the mark of the beast, and the same as worshipping the beast, then your salvation is lost and also you will suffer from all the plagues that God rains down upon the world. This trial, test, or temptation that comes upon the whole world is one that everyone will need to make a choice. For God's people there is no compromise, it is either a pass or fail, nothing in between. God set this temptation up knowing how difficult it will be for his people in going forward outside the One World System in today's time with the technology the Government will have, making the world a very small place. Therefore by placing our Trust in God, it is most likely that He will provide some help to his people once you have made the correct choice in going forward. Remember that your reward provided you endure to the end and continue on the narrow path is that of being given Saint status, which means you will be with Yeshua during the Millennium and serving in ruling the world helping in enforcing God's Will.

Making the right choice in going forward outside the One World System is a very difficult one, it is one made based solely upon faith and trust in God. One needs to start looking to join with like minded others, those that obey God, in order to form small communities to go forward together. This needs to be done before the Tribulation starts, since time is running out, the sooner the better.
