

World Wide Lawlessness

William J.D. Shaw updated: Nov 11, 2021

Introduction

What is suddenly happening throughout the world ? Everywhere lawlessness is occurring in pretty much all Nations and in various levels or degrees of disruption. We were told by Yeshua (Jesus) that in the end times or in the times of sorrow that lawlessness would occur, and Yeshua was referring to changes taking place throughout the entire world. The end times or end of the world are when the times of sorrow occur followed by the Tribulation and the second coming of Yeshua. Lawlessness is one of the major prophetic warnings that is heralded in to alert those who are His and living as the end times approaches and gets more and more under way.

Mat 24:3 And as he sat upon the mount of Olives, the disciples came unto him privately, saying, Tell us, when shall these things be? and what *shall be* the sign of thy coming, and of the end of the world?

Mat 24:4 And Jesus answered and said unto them, **Take heed that no man deceive you.**

Mat 24:12 And because **iniquity** shall abound, the love of many shall wax cold.

The word iniquity is Strong number G458 and means ; violation of the law, wickedness, transgression of the law, unrighteousness.

The word iniquity in the verse from Matthew above is breaking God's law or Torah and the growth of wickedness and unrighteousness, the loss of love towards our fellow man. It is one of the major signs that will arise in the end times. In a general sense the term iniquity from the Merriam-Webster dictionary it means gross injustice, wickedness. It means an absence of moral or spiritual values. For this to become apparent throughout the world, it is seen in the present day protests in many countries and some reports of hatred and wishing death upon others. In order to understand this one must look deeper into the reasons and what is really happening.

In addition other changes occurring in the time of sorrows are given to us from Yeshua.

Mat 24:4 And Jesus answered and said unto them, **Take heed that no man deceive you.**

Mat 24:5 For many shall come in my name, saying, I am Christ; and shall deceive many.

Mat 24:6 And ye shall hear of wars and rumours of wars: see that ye be not troubled: for all *these things* must come to pass, but the end is not yet.

Mat 24:7 For nation shall rise against nation, and kingdom against kingdom: and there shall be famines, and pestilences, and earthquakes, in divers places.

Mat 24:8 All these *are* the beginning of sorrows.

Yes many will preach deception and lies. There will be wars and rumours of wars, nation will rise against nation and kingdom against kingdom. Peace will be taken from the whole world. There will be famine and pestilences and earthquakes throughout the world. When these occur they are just the beginning of the catastrophes that are to come. Once started things will grow becoming worse and worse each year.

Covid-19

The world changed in a major way starting late in 2019 but making 2020 the year with sudden and disastrous changes and effects felt throughout the entire world, and will definitely continue in the years ahead. This phenomena caused by a contagious virus is not over, nor will it be for some time. This virus was the trigger of being able to see the lawlessness but not the sole event driving the reaction of people to protest. The killing of black people in America added fuel to the emotions of what people were feeling from the effects of the virus. The rise of anarchy in the black live matter group was part of seeing the lawlessness running rampet. When you look at the reasons for the widespread behaviour we find a number of specific emotions and attitudes surfacing. It is not something anyone could have predicted, but there it is as an accurate prediction in the Bible.

What did the Covid-19 do to the emotions of the populations ? To answer this let us first look at some major effects on a Nations population. First there is fear that arises due to the unknown, a totally new virus that is very contagious and brings the possibility of death along with it. It takes time in understanding the way the virus acts and the degree of death rate, how exactly it is spread and how to treat it. This new knowledge has taken a considerable period of time to be understood, since it is something never seen previously. In our instant gratification society this delay in knowledge creates additional problems in expectation of a demand for knowing in people. People do not like change, especially sudden change, nor do people like uncertainty especially when it comes to disease with life and death as a possible outcome. In some people not only will fear surface but also anger since most will feel helpless as to what is transpiring. In a few people it will trigger anxiety to the point of panic.

As a result of this virus there were many other effects that developed being listed in the following; the loss of employment and loss of income resulting in economic hardship, the loss of small businesses, the isolation of individuals, the restriction and loss of social contacts and socializing, effects of self isolation and of children being continually at home, conflicts with parents being together continually, working from home, restrictions for travel, shortage of items, loss of holidays, changes in education, general health care postponed, shut down of restaurants as well as beauty parlors and barber shops and exercise facilities, longer times and lines for various services, limited Church services and a major restriction on personal liberty with having to follow mandatory rules that continually change, and many other direct effects of social distancing and wearing face masks and City lockdowns that can be enforced a number of times. Not to forget the uncertainty concerning all aspect of life and the suddenness of change.

Third is an effect that is not seen as yet. It is the accumulation of national debt that each country is experiencing as a result of trying to reduce the economic pain and damage people and businesses are experiencing as a result of the virus. In addition the extra health cost in trying to control the virus and treat those who become seriously ill. The attempt to keep the national economy on an even balance is at a cost of high rising National debt which is taking place at a time the countries tax base is decreasing as a result of the disruptions. Again there is uncertainty on

how long this action by governments will last and the long term effect on the Nation. There is uncertainty in how long a time period the covid-19 virus will continue in raising havoc and how many waves of the virus that will occur. Recently it is becoming obvious from what is happening in the highly “vaccinated” countries that covid-19 cannot be overcome and defeated by the gene therapy that is called a “vaccine”.

Those that are acting with lawlessness placed blame upon their nations leaders. However initially it would not matter who was leading the nation, everything was unknown as to how to go forward in controlling and minimizing the damage to society. Even at this time as knowledge is increasing on covid-19, society is not eager to go back into lockdowns and isolations in order to contain it. Along with re-established lockdowns that will come, lawlessness will continue to grow. It is become more apparent with knowledge that is being seen that the Nation Leaders are now becoming the ones going forward as dictators or lawless ones.

Climate Changes

There are many effects taking place and they are still developing and redefining society as a whole. Combine the virus with the effects of climate change. Associated with climate change are forest fires, flooding, heat waves, drought, greater severity of storms such as monsoons, hurricanes, typhoons and tornados, melting ice caps and rising sea levels. Generally the weather is more erratic with wider swings and not in keeping with short term past history. The effects of weather change are creating large expenses for many countries and as the effects continue it will have a major effect on world food supply. The world is being hit by more than one change, rather a number are occurring simultaneously. The uncertainties of life are changing quickly and on many fronts. Recognize that the changing weather related effects are worldwide, as is the Covid-19. It appears that the severity and frequency of the weather aberrations are becoming worse each year. These weather effects will also have debt effects on every countries government and their resources. The weather changes are adding to uncertainty as affecting each person's life.

However not all forest fires are a result of climate change. Recently (Sept 2020) in California, Oregon and Washington State there have been enormous sized forest fires which were set purposely by a few people. These are anarchists, those few lawlessness people working to destroy an existing society, trying to undercut existing national authority and working towards trying to initiate a country, established on democracy, towards its failure. Once a forest fire is ignited by whatever means, in today's time it burns more ferociously and is difficult and harder to control and put out than in the past. This behaviour is a result of climate changes of hotter temperatures combined with drought and high winds.

Nation Conflicts

World trade has been turned upside down starting with action of the U.S.A. and it's approach to trading with other countries in 2019. This is having a world wide effect on nearly all countries in various degrees. What one sees is major changes and uncertainty as time goes forward. An inevitable outcome appears to be rising consumer prices and rising company operating costs throughout the world. It will also likely lead to more shortages whether permanent or temporary.

In addition NATO is undergoing changes particularly associated with European nations. Movement is underway towards the formation of a European Union army as well as major changes in the U.S. continued involvement in NATO. Also, Turkey which is a NATO member aligning itself with Russia and becoming aggressive towards Greece which is also a NATO member. Again this area of giving balance in maintaining world peace has uncertainty that has come into being recently.

The United Nations is being questioned from its continued bias towards Israel and general inaptitude in efforts towards helping to maintain world peace. The World Health Organization is also being scrutinized as well as other world run organizations.

The underlying outcome seems directed by a sudden approach, by many countries, to where they are abandoning globalism and looking inward to benefits for their country before any co-operation with other countries. The outcome will be major effects on present day trade and flow of goods between countries as well as changes in national co-operation. It is an attitude of every country for itself. Reticence between Nations may be co-operation but the action within a country does not necessarily follow.

Civil Unrest

Within countries civil unrest has been growing especially over these last years. The U.S. has a major divide that has arisen first between the Republicans and the Democrats. This divide is far beyond anything that is reasonable or logical. There has been an unjustified hatred that has surfaced, one that could easily lead to a civil war. Second a major divide has grown between “vaccinated” and unvaccinated people. This divide is not based upon science, rather it uses illogical thinking.

In Europe, some countries, more than others are showing civil unrest. In South America we see the same effects, in Venezuela, Brazil and Chile. In Africa there is unrest in Ethiopia, Sudan, Libya and South Africa with continued unrest in Nigeria and its surrounding countries. Iraq, Iran, Syria and Lebanon lead the way at the moment with turmoil and unrest, but unrest is also occurring in Israel. In Europe, France and Germany have rising civil unrest. Even Russia is starting to show unrest. Generally it seems to be spreading and growing as a result of the many major changes in today’s time. Australia is leading the way in draconian measures applied to covid-19.

Civil unrest in 2021 in the USA is being caused by Biden and his disruption of society. What they call a “vaccine” for covid is being mandated on the population. Supply chains are breaking down caused primarily by government policies. Coal and Petroleum energy is being phased out by government, the consequences yet to be fully experienced. An illogical and unjustified hatred is growing from the “vaccinated” towards the unvaccinated. Government policies are stifling the growth and production of food. Biden is purposely trying to crash the monetary system in order for a reset to occur. Everything is acting together to create more civil unrest.

The migration of people fleeing from impoverished and countries of persecution are becoming a major problem with many nations throughout the world. The numbers are continuing to grow larger all the time. Most countries are trying to control their borders, the USA has opened its

border to free and welcoming entry. In all countries irrespective of how they treat their borders, it is acting to aggravate civil unrest and the main effect of this within the countries is yet to come.

Wars and Rumors of Wars

In today's time rumors of wars occur mostly in the Middle East however a rumor of war between China and Taiwan as well as between China and the USA has surfaced. Conflicts between Greece and Turkey occurring in the Mediterranean over gas and oil drilling rights, has and still does bring these two nations close to war. There are a large number of war ships in the Eastern Mediterranean consisting of Turkey, Greece and France. Recently a collision between two war ships belonging to Greece and Turkey occurred. Conflicts between Egypt and Ethiopia on a major dam that affects the Nile river is serious and unresolved. Sudan is also undergoing changes that are under scrutiny through the rest of the world. Saudi Arabia and Iran are at serious odds along with Yemen adding to the mix. Problems exist between Russia and the Ukraine. There has been an ongoing conflict between Israel and Iran and the proxies of Iran, this has been underway over a long period of time. There have been continued conflict between Israel and the Palestine's which is always close to war. India and China are having border conflicts, which has led to skirmishes lately. There is North and South Korea with a long standing conflict. Recently China is becoming more aggressive throughout the entire world trying to force other countries to its will that are dependent as a result of the loaning its money to them. The U.S. is at odds with Iran in the Middle East and with China in the South China seas.

The main wars currently underway today are a civil war in Libya, with Turkey and United Nations involvement. This may also escalate to involve Egypt. Syria has a long standing civil war that has not as yet finished although the country has been destroyed. Suddenly Afghanistan has changed upsetting a balance in that region of the world.

When taking account of all the rumors of wars and current wars, the world is living on top of a tinder box, this is especially true today since conflicts are rising between the world's strongest countries. This in turn gives the inhabitants of the world further uncertainty as to how things might unfold in affecting their lives.

Famine

The effect of famine coming upon the world is just starting. Growing crops are tied to the weather but also disruptions due to disease of both plants and people, as well wars add to the outcome. These all together have a major effect. The weather changes insect behavior which in turn affects crop production. Lately locusts have been devastating crops in the southern hemisphere. Continued yearly flooding in the Three Gorge Dam region in China has resulted in major crop failures, this area provides roughly 30% of the worlds food supply. Due to covid-19 considerable effect on crop loss has occurred from sudden change in demand and in disruption in both distribution and processing . Problems in supply chains are making food distribution more difficult. Food prices in North America are rising very noticeably. The coming year will tell whether famine has come upon the whole world. Famine has an effect on food prices but also on those in third world countries having people starving and dying. Recognize that famine and war have a major effect on bringing pestilence upon mankind. The Nations of the world and their action on

climate change is going to severely affect food production in a negative manner. China with its large population and severe crop losses due to flooding, drought and locusts is in a desperate condition. The bread basket of the world, USA, has experienced major crop losses in 2021 due to drought, similar conditions are occurring in Russia. Everything in the world is leading towards promoting famine. Recently disruption in the production and trade of fertilizer has occurred. The cost and shortage of natural gas is playing a major role and fertilizer costs are rising significantly. This in turn will have a major effect in promotion of famine.

Peoples Attitude

In today's time the attitudes of young people in particular is different from a few generations before. First they take freedom as their right, even though it was not through their efforts that freedom was secured for their Nation. They do not accept that freedom also carries with it a personal responsibility. Young people have a self centered attitude they do not recognize or adhere to their responsibility to the society in which they live. They erroneously think everything is about them. Their approach in going forward is basically one of lawlessness.

Second, factors affecting many others of various ages in the population, comes from fear which builds into anger along with the need to identify someone to blame or to direct their anger towards. People do not like change, especially sudden change and combined with this is uncertainty, that promotes fear and anger.

A major problem in attitude of government officials and that carries over to the majority of the population is following and accepting what they are told from the main stream news media. The main stream news media throughout the world has censored everything that goes against what they wish to promote. Recently more lies are coming to be recognized, but logic in many leaders and their populations has been throw out and will not come to acceptance of what they see. It will continue in acting to divide and strengthen both camps causing more hatred and civil unrest.

Summary

Recently the world has been changing very suddenly and now more drastically as a result of combined effects. The comfortable and routine life style many were living previously has been dramatically changed. The Covid virus is unfortunately going to have continued effects for a considerable period of time. Climate change is not something that man can do anything about, recognize the earth belongs to God and that He is in control, He controls the climate as well as earthquakes and volcanic activity. The world is experiencing the Biblical time of sorrows with the prophetic warnings. The very first is false teachers then followed by wars. Now it has progressed to lawlessness throughout the world. The wars and rumors of wars as well as nation against nation and kingdom against kingdom will soon increase. Peace being taken from the world as in prophecy prediction has occurred in a major degree. Somewhere in the mix will be famine and these various activities are cumulative occurring all together and intensifying as time progresses.

Wars and rumors of wars have been around for a long period in our relatively recent time. So one becomes somewhat desensitized. However the intensity involving major nations appears to be quickly building. Ezekiel's war could occur at any time as predicted in the Bible. One cannot ignore the world wide phenomena of lawlessness, it not something ever seen in the history of the world where the standard of life has been so good. If famine starts to increase there should be no question that we are well into the times of sorrows. Bible prophecy tells us things are going to become much worse from now on.

What is occurring as told to us in the Bible is in fact the wrath of God starting to come upon the entire world. We are already somewhere within the sequence of the first three plagues. God's people are not protected from the first three plagues, protection only begins and occurs over the last seven plagues. As time progresses we will see more Bible prophecy being fulfilled. Recognize that the Bible tells us these changes will multiply with all of them acting together simultaneously and take place over many years. This will result in life becoming increasingly difficult with each passing year, becoming more and more difficult than the previous year.

In order to see what is truly happening in the world today, one must find trustworthy alternate news sources. The main stream news only gives their narrative and suppresses the truth of what is occurring. Epoch Times is a trustworthy news source in today's time, it gives a balanced reporting of world events.

The pharmaceutical industry that is bought into by all governments developed a gene therapy that uses mRNA, that in turn affects DNA. It uses aborted fetal tissue. It is man playing at being god and not knowing what the outcome will be. The gene therapy is a totally new experimental approach and the long term effects are not known at this time. This has all come to light over the last year. Trust in God and not in the World.

If you are not walking according to God's word, you need to start to change now as it will take time for you to change and grow and time is running out. You need to read God's word and think for yourself on what is being said, do not follow what others tell you or any church doctrine. Only follow what the Bible tells you. Make sure you get rid of any preconceived ideas that you might be carrying, approach God's word with an open mind and let it tell you what God is saying. Letting go of preconceived ideas is easily said but not easily done. As God's word speaks to you follow and obey as God directs you. Finding and walking on the correct path takes a considerable period of time, it is not as one might think that they can change quickly.

Understand that going forward properly requires change on two fronts together, both are required. One is walking forward according to God's directives and the other is growing in your heart according to God's values.
